

Our Approach to Education

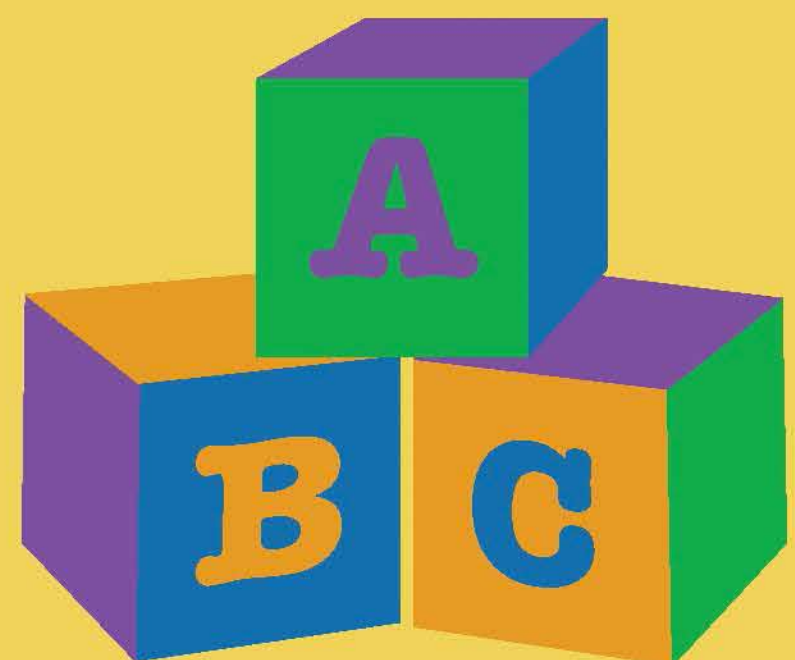

We have created a unique environment with your child in mind. Every day that your child attends our center, you will have the peace of mind that the medical attention and education that is needed will be available.

Your child will be able to engage in developmental activities that are well planned, appropriate, and fun, including:

- Circle Time
- Arts and Crafts
- Music and Movement
- Story Time
- Sensory Play, which will develop fine and gross motor skills activities

A communication book explaining your child's activities, including a full behavioral report, will be sent home daily.

We realize that emotional support for families is a vital component of your child's care. We will be here every step of the way, and **always welcome your thoughts and suggestions.**

If you'd like to make a referral, begin the admission process, schedule a tour, or if you would like additional information, please call the center at 732-323-8400

A Medical Approach to Day Care

because being medically fragile shouldn't stop a child from living a child's life

a Qualified and Caring Staff

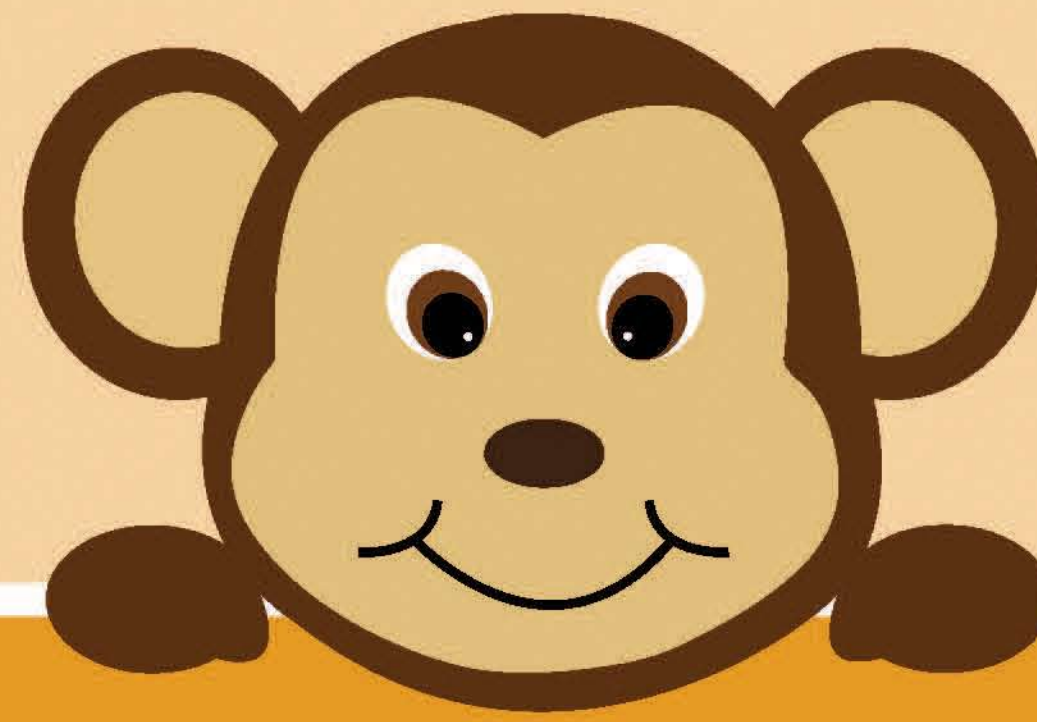

We have put together a team of caring and knowledgeable health care professionals. Our team members include pediatric nurses, social workers, teachers, activity staff, pharmacist, dietitian, and therapists, all under the direction of our pediatrician.

Clinical Process

After a complete assessment, we will be able to develop a plan for your child. With the input and approval of your child's pediatrician, we will know exactly what treatments, services, medications, and diet to provide to your child.

Our occupational therapists will work closely with you and your child's physicians to ensure that the medical and rehabilitation needs of your child are met. If additional speech, physical therapy, special education, or psychological services are required, the therapists will help coordinate the program.

Qualifying Criteria

The admission criteria is the following:

The child must be:

- under six years of age
- technology dependent or medically unstable
- requiring continuous nursing services

Our capabilities include care of the following:

Tracheotomy
 Ventilator
 Central Venous Pressure (CVP) line
 Hyperalimentation
 Gastrostomy Tube
 Nasogastric Tube
 Nebulizer Treatments
 Administration of Oxygen
 Asthma Care
 Diabetes Care

We may also be able to help your child if he or she:

- is unable to thrive in conjunction with chronic conditions
- has congenital disorders requiring ongoing medical attention
- is a medically fragile asthmatic
- is an unstable diabetic

funding for our facility

Manchester Pediatric Medical Day Care is a licensed provider with the New Jersey Medicaid Program and contracted with all major Managed Medicaid Organizations.

The Center will work with you to acquire funding through Medicaid or your private insurance carrier.

The admission process can be intimidating; we'll help you! We'll visit with you in your home to assess the needs of your child. We will coordinate with your child's pediatrician or suggest a pediatrician if you do not have one. We'll assist you in obtaining authorizations from insurance companies, and will be working with you every step of the way for a smooth transition.
